### PROFESSIONAL SUMMARY

---

Motivated final-year Bachelor of Computer Applications (BCA) student aspiring to build a career in Machine Learning and Artificial Intelligence. Hands-on academic knowledge of Python, Scikit-learn, TensorFlow, and Exploratory Data Analysis (EDA), with an understanding of data preprocessing, feature engineering, and machine learning model development. Eager to apply analytical and programming skills to real-world AI/ML problems and contribute effectively as an entry-level professional.

### EDUCATION

---

#### Bachelor of Computer Applications (BCA)

Kongunadu Arts and Science College | Final Year / Pursuing | Expected Graduation: 2027 | CGPA: 7.0

### TECHNICAL SKILLS

---

**Programming:** Python, SQL

**Machine Learning:** Scikit-learn, Classification, Regression, Feature Engineering, Model Training, Model Evaluation

**Data Analysis:** Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Matplotlib, Seaborn

**Deep Learning:** TensorFlow, Neural Networks, Basic Deep Learning

**Tools & Platforms:** Git, GitHub, Jupyter Notebook

### MACHINE LEARNING PROJECTS

---

#### [Project Name – Machine Learning]

*Python | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn*

- Analyzed and explored the dataset using Exploratory Data Analysis (EDA) to identify patterns, relationships, and data-quality issues.
- Preprocessed data by handling missing values, encoding categorical features, and preparing relevant features for model training.
- Implemented and evaluated suitable Machine Learning algorithms using Scikit-learn.
- Visualized key findings and evaluated model performance using appropriate evaluation metrics.

#### [Project Name – Deep Learning / TensorFlow]

*Python | TensorFlow | NumPy | Pandas*

- Developed a basic neural network model using TensorFlow for [classification/regression] prediction.
- Preprocessed and prepared the dataset for efficient model training and validation.
- Trained and evaluated the model using appropriate performance metrics.
- Analyzed model performance and explored opportunities for improving predictions.

#### [Project Name – Data Analysis / ML]

*Python | Pandas | NumPy | Scikit-learn | Seaborn*

- Conducted data cleaning and Exploratory Data Analysis to understand important dataset characteristics.
- Performed feature selection and engineering to prepare meaningful inputs for Machine Learning.
- Built a predictive model using Scikit-learn and evaluated its performance.
- Created visualizations to communicate important insights from the dataset.

### CERTIFICATIONS

---

- [Machine Learning Certification]
- [Python Certification]
- [TensorFlow Certification]
- [Data Science Certification]

## ACADEMIC / PRACTICAL EXPERIENCE

---

- Applied Python and Machine Learning concepts through academic assignments and self-directed projects.
- Practiced data preprocessing, Exploratory Data Analysis, feature engineering, model training, and evaluation using real-world datasets.
- Used Jupyter Notebook, Git, and GitHub for developing, organizing, and maintaining technical projects.

## ACHIEVEMENTS & ACTIVITIES

---

- [Hackathon / Coding Competition]
- [Machine Learning Workshop / Technical Event]
- [Academic Achievement]
- [Online Technical Challenge]
